RIAHI FEDI

Full Stack Developer

riahifedi@outlook.fr • https://fedi-riahi.vercel.app/ • Ben Arous, Tunisia

Summary

Experienced web developer skilled in all stages of advanced web development. Proficient in designing user interfaces, debugging, and optimizing web applications for performance and scalability. Equipped with a diverse and versatile skill set, including expertise in a wide range of technologies. Capable of effectively self-managing independent projects while excelling in collaborative team environments. Passionate about creating seamless, user-centric digital experiences and leveraging cutting-edge technologies to drive business growth.

Experience

Iware
Sousse, Tunisia
Full Stack Developer
02/2024 - 06/2024

- Platform for browsing and purchasing Mercedes-Benz cars and genuine parts with detailed specifications
- Achieved a 30% increase in user engagement by integrating advanced search and filtering options, enhancing the overall browsing experience
- Functionality for scheduling and tracking maintenance appointments and service history
- Reduced appointment scheduling errors by 20% through a user-friendly interface and automated reminders, improving customer satisfaction
- Mobile and desktop optimization with an intuitive, personalized user dashboard for managing purchases and services
- Safe payment system for purchasing cars, parts, and booking services, along with secure user accounts
- Real-time customer support via chat and phone, plus notifications for exclusive offers and limited-time promotions

TIS Circuits
Ben Arous, Tunisia
Front end Developer
06/2022 - 08/2022

- Designed responsive, user-friendly layouts with a focus on accessibility and seamless navigation
- Integrated interactive charts, graphs, and real-time data updates for actionable insights
- Developed collapsible sidebars, breadcrumb trails, and search functionalities for effortless usability
- Enabled light/dark modes and modular widgets to enhance user personalization and experience

AIO events
La Marsa, Tunisia
Front End Developer
02/2025 - 03/2025

- Developed a user-friendly platform for browsing, searching, and booking various events such as concerts, workshops, conferences, and social gatherings.
- Integrated advanced search and filtering options (e.g., by category, location, date, and price), resulting in increased user engagement and a smoother browsing experience.
- Implemented a secure ticket booking system with real-time availability updates, reducing booking errors.
- Created an intuitive event details page featuring comprehensive information, interactive maps (Google Maps API), and user reviews, enhancing user trust and decision-making.
- Optimized the platform for both mobile and desktop users, ensuring a seamless experience across devices and increasing mobile traffic.
